Language is needed by human being because by language human can get their needs by communicating each other. As a verbal communication, language is a sound symbol which is arbitrary. The statement before encourages to study one of the lexeme of Japanese language which is often heard or known by Indonesian people, that is hai. Based on that, this study will analyze the research problem: (1) what are the hai contextual lexeme in detective Conan comic volume 59, 63, and 64. (2) how to use the hai contextual lexeme in detective Conan comic volume 59, 63, and 64.

The source of this research taken from detective Conan comic by Aoyama Gosho. The comic used because the story reflects the daily life, the language used is also simple, and easy to be understood by every reader from children to adult. The data taken was dialogue which contains hai lexeme. Therefore, the researcher used descriptive qualitative method which is a method that describes the phenomena where the activity is studied and then the conclusion is made. This method is used to analyze the hai meaning in detective Conan meaning. The main reason of using this method is to show the fact, the condition, and the phenomenon that happens when this research is done.

In this detective Conan comic, the researcher found sixty nine dialogues that contains hai lexeme. From those three volume of the comic, the researcher found twenty nine hai lexeme which means koutei, twenty one which means shouldake, twelve hai lexeme which means outou, three hai lexeme which means aizuchi, three hai lexeme which means kanki, and there is no hai lexeme that means tsuinin. Besides, from 5 hai meaning that is found, there are differences in the usage of hai lexeme, which are confirmation, approval on demand, approval on requirement, approval on invitation, answer when called, respond to information submitted, and attract attention. For the next research, it is expected to find more source of data so the usage of hai lexeme can be found more complete.
